

Java or SCALA Senior Developer - Software Engineer

Explore Consulting seeks experienced developers proficient in development of highly scalable web applications written in Java & Scala running on the JVM. Experience with message bus and service-oriented architectures is a big plus. This is an opportunity to contribute to the architecture and development of a large-scale application that will be built from the ground up. This is an opportunity to work with a team of smart people in a fast-paced results-oriented environment while working on cutting-edge projects. We have several exciting custom development initiatives underway in a variety of business verticals including professional sports, molecular diagnostics, mobile applications, eCommerce and more. This is a full-time position in the Puget Sound area with benefits and little to no travel.

Requirements

- At least 5 years of software development experience, and user interface development
- Experience with Java and/or Scala in a production environment
- Must be a self-starter with solid real-world experience in application development
- Excellent analytical and problem solving skills
- Excellent written and verbal communication skills with an aptitude for learning new technologies
- Experience in relational database design & development (No SQL or Big Data is a big plus)
- Experience developing with agile methodologies
- XML / Web Services experience
- Familiarity with Web UI technologies a plus (JSPs, Struts, AJAX, Web 2.0 UI, etc.)
- JavaScript experience a plus
- Experience in biotech a plus

Explore Consulting specializes in development and integration of web-based and mobile business applications. Owned and operated by former enterprise developers, we offer a unique business model that encourages innovation and forward thinking. We offer highly competitive compensation and value work-life balance in a team-oriented environment.
