

## Senior Developer & Technical Lead(C#, .NET, JavaScript)

Explore Consulting is a leading expert on cloud-based business systems, and has assisted more than 800 companies over the past 13 years with a variety of technology needs, from custom application development and systems integration to designing and deploying eCommerce web sites and mobile solutions. At Explore, you will be working with the best team on the hottest technologies, all within a fun environment where we work and play hard while enjoying life balance.

We are seeking a Senior Technical Developer with experience in .Net, C#, Microsoft SQL and JavaScript. This is a great opportunity to utilize your past experience and continue building on your development skills in an environment that promotes creativity and innovative thought. Examples of projects currently underway include mobile app development for the NFL, development of a cloud-based platform for professional teams (NFL and MLS currently), high school and college scouting systems, integration between leading cloud-based systems (NetSuite, Salesforce.com, Amazon, etc), and a wide variety of other technical efforts. We are looking for developers to join our in-house downtown Bellevue consulting team to participate in custom development, ecommerce, web-based business systems, mobile application development, and other initiatives. This is a full-time position with benefits and little to no travel.

### Requirements:

- Experience designing and architecting solutions
- 4+ yrs of software development experience, and user interface development
- 3+ yrs of development targeting the .Net platform: C#, ASP.NET, Entity Framework, LINQ, ADO.NET, Windows Communication Foundation
- REST, Web Services, XML and/or JSON experience
- Bachelor's degree or equivalent experience
- Must be a self-starter, and have good understanding of application development and the SDLC
- Excellent analytical and problem solving skills
- Excellent written and verbal communication skills with an aptitude for learning new technologies
- Experience in database design & development (MS SQL or MySQL)
- Knowledge of current technologies and best practices
- Experience with DTS, SSIS, and database integration
- JavaScript, HTML5, CSS3 experience a plus
- Design (UI) skills a plus
- Experience with ERP, CRM, or SFA tools is a plus

Ride the wave! Cloud technologies are the wave of the future and we've had our head in the cloud for over 13 years. Explore Consulting specializes in development and integration of web-based applications. We are the

largest reseller and solution provider for NetSuite, a web-based, hosted set of business applications and a leader in the SaaS space. We build applications and websites that integrate to their product, as well as full custom solutions for a variety of customers in many verticals.
