

## Staffing Services: The Explore Advantage

We personalize our services to provide value for your organization. After all, we don't just care about IT, we care about IT that works for you.

### Our Personal Focus

We are skilled in all phases of the systems development life cycle, specializing in Oracle/Microsoft database solutions for custom and packaged applications, database administration, data warehousing, database marketing and enterprise architecture. Whether your organization is looking to implement its first application or simply needs assistance with an existing system, the Explore team can be counted on to resolve the challenges you're facing.

### Our Integrity

We provide a strong support system within the company, and are always willing to share knowledge and resources as needed to accommodate the best possible decision-making from client to client.

### Our Expertise

We believe that training and mentorship are some of the most important aspects of consulting. Our people work diligently to establish a solid understanding of the client's needs. Our innovative technology solutions have been recognized by Fortune 500 clients such as; Microsoft, Nordstrom, Amgen and Berlex.

### Our Industry Connections

We have been deeply involved in the Seattle area technology ecosystem for 14+ years and have developed an extensive network of industry leaders and technologists. Utilize our connections and ongoing top-tier recruiting efforts to fulfill your staffing needs.

## Staff Augmentation Benefits

We understand how challenging it is to efficiently operate when resources are low. Explore Consulting offers customized assistance to provide clients with effective solutions which will not only control costs, but will also enhance the company's business edge:

- **Avoid the delay and expense of recruiting** for in-house expansion or keep your operations flowing smoothly while you find and hire the best candidate for your department team.
- **Gain a fresh perspective and new, innovative ideas** to achieve project objectives and leverage the skills of other existing staff.
- **Redirect resources** from non-core activities toward consumer costs, building competitive strength.
- **Make more efficient use of capital, technology and resources.**
- **Improve management** to freely focus on developing strategies and initiatives to meet your business objectives.
