

## Development Manager

Explore Consulting is a leading expert on cloud-based business systems, and has assisted more than 800 companies over the past 12 years with a variety of technology needs, from custom application development and systems integration to designing and deploying eCommerce web sites and mobile solutions . At Explore, you will be working with the best team on the hottest technologies, all within a fun environment where we work and play hard while enjoying life balance.

We are seeking a Development Manager to lead a team of technical consultants and projects, and participate in product development initiatives. You should have a minimum of 8 years' experience with designing and developing technology solutions. Your experience should include .Net, C#, Microsoft SQL, and JavaScript technologies in a back-end and web application environment. This is a great opportunity to utilize your past experience, continue building on your development skills, and provide mentorship and leadership to a growing team while interfacing directly with end customers. Examples of projects currently underway include mobile app development for the NFL, development of a cloud-based platform for professional teams (NFL and MLS currently), high school and college scouting systems, integration between leading cloud-based systems (NetSuite, Salesforce.com, Amazon, etc.), and a wide variety of other technical efforts.

We are looking for a Development Manager to join our in-house downtown Bellevue consulting team to participate in and manage custom development, ecommerce, web-based business systems, mobile applications, and other initiatives. This is a full-time position with benefits and little to no travel.

### Requirements

- Experience leading a software project or software development team
- Success in driving projects to completion
- Experience designing and architecting solutions
- Ability (and enthusiasm) in mentoring less experienced developers
- 8+ yrs. of software development experience
- 3+ yrs. of development targeting the .Net platform: C#, ASP.NET, MVC, WCF
- REST, Web Services, XML and/or JSON experience
- Bachelor's degree or equivalent experience
- Must be a self-starter, and have good understanding of application development and the SDLC
- Excellent analytical and problem solving skills
- Excellent written and verbal communication skills with an aptitude for learning new technologies
- Experience in database design & development (MS SQL)
- Knowledge of current technologies and best practices
- Experience with DTS, SSIS, and database integration
- JavaScript, HTML5, CSS3 experience a plus

- Design (UI) skills a plus
- Experience with ERP, CRM, or SFA tools is a big plus

Ride the wave! Cloud technologies are the wave of the future and we've had our head in the cloud for over 10 years. Explore Consulting specializes in development and integration of cloud-based and mobile applications. We are the largest reseller and solution provider for NetSuite, a cloud-based set of business applications and the fastest growing ERP solution in America. We build applications and websites that integrate to their product, as well as Amazon Webstore and fully custom solutions for a variety of customers in many verticals.
